## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 16, applicant should clarify what is intended by “non-parallel to the centerline to endow zones at opposite sides of the core.”

Regarding claim 19, applicant should clarify what is intended by “that endow opposite sides of the core with zones that have a defined longitudinal profile.”

Regarding claim 21, applicant should clarify what is intended by “with which the two laminations bounding the stack are respectively in contact comprise such tabs in contact with *the respective tabs of the two laminations bounding the stack.*”

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19-22, as best understood in view of the rejections under 35 U.S.C. 112 second paragraph, are rejected under 35 U.S.C. 102(b) as being anticipated by Kikuta et al. [US 5,703,556].

Kikuta et al. discloses a core structure for an ignition coil [figures 3-6] comprising:

- a plurality of individual stacked flat laminations [figures 3-4] arranged parallel to a centerline, each lamination comprises opposite longitudinal edges that are non-parallel to the center line *to endow zones at opposite sides of the core with a substantially frustoconical profile* [figure 6].

- the zones are separated by flat outer faces [figure 3].

wherein some of the laminations comprising tabs [10a] projecting outward from their longitudinal edges beyond the frustoconical profile.
